

ASSISTIVE TECHNOLOGY ASSESSMENT AND TRIAL

LifeTec's occupational therapists are highly trained in the assessment and prescription of complex assistive technologies and provide convenience and peace of mind by offering this service at home, the workplace or even school.

AUGMENTATIVE AND ALTERNATIVE COMMUNICATION

Our speech pathologists are highly trained in the assessment, trial and training of augmentative and alternative communication systems. People with complex communication needs may benefit from our comprehensive AAC assessment to fully understand their AAC requirements.

COMPLEX HOME MODIFICATION

Our occupational therapists specialise in the assessment and coordination of home modifications. We can work with you to maximise your independence and safety in your own home by making changes to the structure, layout or fittings of buildings. We can assist in the provision of both minor and major modifications.

BUILDER ONBOARDING

To further support our clinical practice in this area, we recognise the importance of builders in co-designing solutions for participants and have developed a "builder onboarding program" that assists builders to understand how to work in this industry. We have found the shared learning has resulted in increased capability across our team, leading to successful outcomes for participants

RESEARCH AND PROFESSIONAL DEVELOPMENT

Central to our strategic plan is to continue to develop innovative approaches to service delivery to increase consumer and stakeholder engagement and outcomes. As such, LifeTec engages in collaborations with key stakeholders, universities, and research partners to better inform the AT process for consumers and provide a more effective pathway for service delivery.

Our learning and development can support your team's development program, building AT specific capability and the capacity of your organisation.

ABOUT LIFETEC

LifeTec is a social enterprise that delivers tailored assistive technology (AT) services to help people live life to the fullest.

Since 1981 people have trusted LifeTec to help transform their lives by enabling them to do the things they want safely with ease.

Our friendly team devote their unmatched experience in everything relating to AT to help people choose the right solutions.

HISTORY

Over the last 40 years LifeTec has established itself as the leader of AT services in Queensland. We are widely recognised for consistently achieving exceptional outcomes for people and our brand is synonymous with quality.

Our success is the result of our purpose driven investment into person centred service models and team. Now your consumers and team can benefit from our value proposition by collaborating and partnering with LifeTec.

Our purpose is to connect people and their communities through AT to enable them to achieve their aspirations.

WHY PARTNER WITH US?

Our industry partners benefit by optimising the application of assistive technology (AT) and accessibility solutions in their organisation through:

- Provide a complete and holistic AT service with continuity of service delivery to your consumers
- Improve the value to, satisfaction of, and retention of your consumers
- Improve deployment, experience and professional development for your workforce
- Industry and consumer-respected expertise in design and implementation for your project
- Increase AT capability of your team through targeted AT training
- Access to LifeTec health professionals at the forefront of assistive technology assessment and solutions

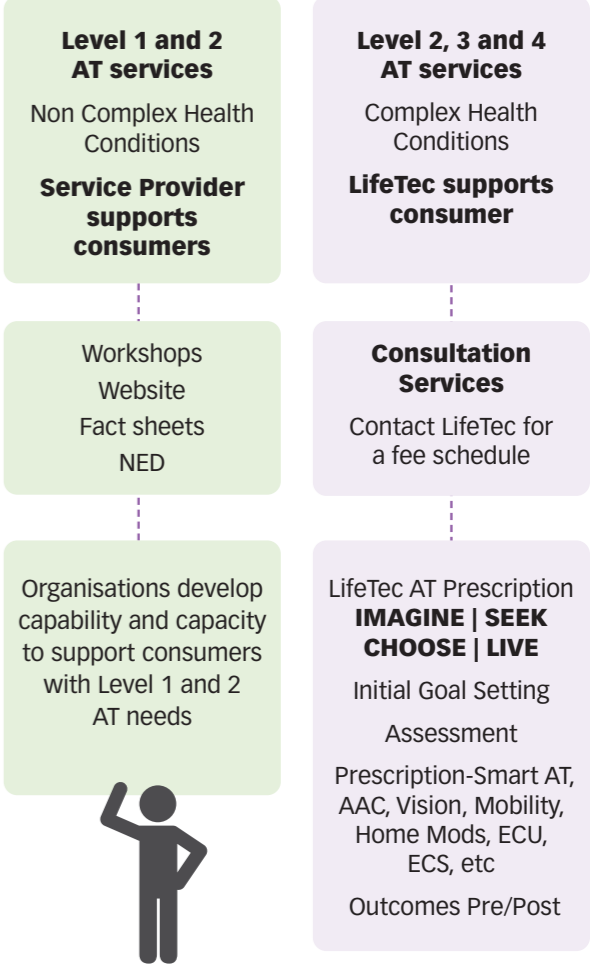

LIFETEC PARTNERSHIP PATHWAYS

Level 1 and 2 AT Services are broad and variable and generally augment activities of daily living and basic community access. With the right level of knowledge and understanding of risk, a non-health professional or a person with a health degree can generally assist consumers.

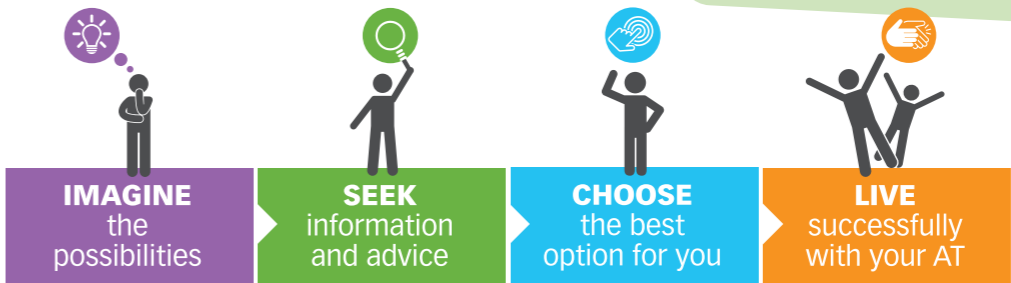

Levels 2, 3 and 4 AT solutions for consumers with complex Health Conditions require input from a Health Professional with specialist training and skill to ensure the outcomes are achieved.

LIFETEC SERVICE PROVIDER CONSUMER PATHWAYS

LifeTec Health Professionals specialise in AT and have developed and use evidence informed practice to co-design AT solutions with consumers. The resource guides the consumer and Health Professional through the 4 stages necessary to ensure good outcomes.

Better AT outcomes for consumers that leads to increased independence, increased social, physical and personal wellbeing, and an improved living environment.
