

ASSISTIVE TECHNOLOGY CONSUMER PATHWAY

IMAGINE THE POSSIBILITIES

What are your current roles, interests and lifestyle? What might be something that's holding you back from doing things you love? These are some of the questions that we will explore together with you, your families, carers and other support organisations to truly discover your needs and goals.

SEEK INFORMATION AND ADVICE

We strive to meet, and where possible, exceed your needs so you can achieve your goals and aspirations! Your needs will be matched with our evidenced based pathway to provide you with the most appropriate assistive technology products, services and solutions. We make recommendations that will guide funding decisions for the NDIS and other government funding options.

CHOOSE THE BEST OPTION FOR YOU

You will be partnered with our team of occupational therapists and speech pathologists to assess, trial and purchase the assistive technology products. Once again, the goal is to ensure that the solution will meet your needs!

LIVE SUCCESSFULLY WITH YOUR AT

Living with the equipment involves making sure there is a plan for implementation, the solution is correctly set up, there is ongoing training, and any troubleshooting is quickly implemented. A schedule for review may be developed into the plan, so there is ongoing support to ensure you are using the AT correctly and any changes in either needs or available options are matched. We mobilise the circle of support, so you can be supported by the team when needed.
