

FACT SHEET
AP01

APPS FOR LOCATION & SAFETY MONITORING

Safety Monitoring Apps can send alerts via text message, email and/or allow carers to monitor location using a map. Alerts can be user activated or activated by movement associated with inactivity, falls or seizures. Some tracking apps allow digital fences (geo-fence) or destination notification to be created which can activate alerts when the wearer steps outside the designated area or reaches a specific location. For details on what features are available see LifeTec's Factsheet Location Tracking Devices.

What can I choose from:

Location Application	Features	Stores
 <p>Emergency + assists the caller to dial the relevant number for emergency/non-emergency situations. It displays the GPS coordinates of the phone's location that the caller can read out to the emergency operator.</p>	SOS Alert	 Android  iOS
 <p>Help Me allows you to send off an SMS text to two (2) nominated 'safety' numbers. Included in the text are GPS co-ordinates from where the text was sent.</p>	SOS Alert Location Tracking	 Android  iOS
 <p>Unus Tactus provides a simplified phone display with room for 4 contacts' photos and a large red help button. When the HELP button is tapped a phone call is placed to an emergency contact and an email is sent with a Google Maps link.</p>	SOS Alert Location Tracking	 iOS
 <p>Epdetect monitors the wearer's movements, distinguishing between normal movement and movement associated with a seizure. If a seizure is detected, Epdetect will contacted and alert your carer with your status and GPS position.</p>	SOS Alert Seizure Detector Location Tracking	 Android
 <p>FallSafety Home is designed for home use with intelligent fall detection and automatic alerts for emergency assistance. Big and small falls are set to be detected by default.</p>	SOS Alert	 iOS
 <p>onwatch Smart Alert: SmartAlert is a Grade A1 professionally monitored app. It has a 2 way voice communication pendant option (Commbadge) available. This pendant acts as a hot button to launch the SmartAlert App without having to touch your mobile phone.</p>	Monitored SOS Alert Location Tracking Geo-fencing	 Android  iOS

Location Application		Features	Stores
	myCare Track is a professionally monitored app. The user of the app check-in using a voice or text message advising of their movements and schedule an automated check-up call following completion of their appointment. If they don't check in then an emergency procedure proceeds. It has a pendant option that acts as a hot button to launch the care track app.	Monitored SOS Alert Time Delay Location Tracking	 Android  iOS
	Life 360 allows you to share your location with who you want, when you want. You can receive notifications when friends and family arrive at favourite places and communicate one-to-one or to an entire group with free in-app messaging.	SOS Alert Location Tracking	 Android  iOS
	Find My (apple) / Locate My Friends (android) helps you locate your friends and identifies their exact location on the app's navigational map.	Location Tracking	 Android  iOS
	EgiGeoZone Geofence is a Geofencing app which determine your location and 'trigger' different actions when entering or leaving predefined zones that you can choose.	Location Tracking	 Android

Environmental Monitoring		Stores
	Zyrtec Allergy Cast gives you access to your local pollen forecast first. You can plan ahead with the four-day calendar and even set alerts to get a heads-up when pollen counts are high. This can also be used to log symptoms and obtain tips	 Android  iOS
	Sick Weather provides real-time alerts whenever you enter a Sick Zone: areas where others have recently reported being sick.	 Android  iOS
	SunSmart lets you know when you need sun protection in addition to the weather forecast. When the UV reaches a level where sun protection is required you can receive an alert.	 Android  iOS
	Weather Zone provides you with current conditions and location forecasts.	 Android  iOS
	EWN (The Early warning Network) provides you with emergency and severe weather warnings based on your physical location. Warnings include severe weather and natural disasters. There is also a help me function to send your location and location to pre-set contacts by email and sms. .	 Android  iOS
